<text><text><text><text><text> Understanding the definition of concussion

Induced by direct or indirect traums
 A defined physiological direction fraction
 An alteration in instantion (marked stab) at the time of the injury (e.g., confusion, dis-orientation, slowed thinking, alteration of concelsances, or mutali stab)
 A period of positraumici, rannosi (JP(PA)
 A ranged evolving, clinical symptoms that may or may net involve less of concelsances (DC)

new (sock) Despite many publications and definitional attempts (MCCmy et al. 2020), these conside-tations have see rearral issues canazonered, notably. Does being dated, seeing dates, or offeting dates in the absence of unmatexicances consolitate either concastion or BBT? The main large of an innor hamps to the hadd both in children and adults in which the wirklink is only momentarizely dates and is completely both constraint which are seen constraintion without hard children and adults in which the wirklink on the main straints and is completely both constraints without hard children and adults in which the wirklink of the main straints are seen as the mainstance of medical labor and their indiscriminates destinuitions to the path.
